Bogdan Șveț

Co-Founder & CTO

Căușeni, Moldova | +373 69 305 397 | eldrago.svet@gmail.com | linkedin.com/in/bogdan-svet

Summary

Technical leader, now co-founder and CTO of an early-stage investor-matching platform. Rose from Team Lead to Director at a Fintech BPaaS company while completing a Computer Science and Engineering degree, leading 20+ people across automation and application development. Builds AI assistants, automation and the platforms around them, from architecture to launch on web, iOS and Android. Reports directly to the CEO on regulatory compliance (GDPR, MiFID II, CNMV, MAR).

Experience

OneBCN Advisors | Barcelona, Spain (Remote) — Aug 2026 – Present

Early-stage platform that helps startup founders prepare their pitch and find fitting investors, with tools for VCs and business angels.

Co-Founder & Chief Technology Officer (CTO) — Aug 2026 – Present

- **Product Strategy:** Led the founder-first pivot and a paid plan; 10+ founders onboarded, 64 funds listed.
- **Prototype to Production:** Shipped a two-sided platform in 2 months with Claude Code, gated by 700+ tests and CI.
- **AI Platform:** Built a Gemini research agent, MCP server and REST API at ~€0.10 AI cost per founder a month.

Proceedit | Barcelona, Spain (Remote, with on-site visits) — Jul 2022 – Jul 2026

Fintech startup offering Business Process as a Service (BPaaS), using AI, RPA and BPM to automate financial and stock market processes.

Director of Automation and Head of Application Development — Jan 2025 – Jul 2026

- **Leadership & Hiring:** Led 20+ people incl. interns across 8+ projects, and ran hiring and onboarding.
- **CMI Launch:** Set credit pricing; shipped iOS, Android and web from one codebase at 99.9% uptime.
- **Growth & B2B:** 300+ paid and trial subscribers (60+ in-app), 1,000+ paid and free orders, 3 B2B API clients.
- **Automation Portfolio:** Cut 220+ hours of manual tasks in 5 business units to seconds with BPM, saving €2,200+.

Application Development Manager — Oct 2023 – Jan 2025

- **Scrum Delivery:** Ran Scrum for a cross-functional team shipping the backend engines and reusable UI components.
- **API & Security:** Built the central engines-and-bots API and moved it to token-based auth (JWT) across 400+ tasks.
- **Cloud Migration:** Moved from Exoscale to AWS, cutting server costs about 20%; removed EC2/RDS bottlenecks.

Application Development Team Lead — Jul 2022 – Oct 2023

- **Team Leadership:** Managed, mentored and coached developers and interns.
- **NLP Delivery:** Led the delivery of a Python sentiment analysis module for financial tracking.
- **Cloud Architecture:** Reworked AWS RDS PostgreSQL schemas for data integrity and engine scale.

Freelance | Moldova (Remote, with on-site visits) — 2021 – Present

AI assistants, chatbots and automation for businesses and individual clients, as the sole engineer.

AI Engineer – AI Workshop Management System — 2026

- **AI Assistant:** Built a Gemini Telegram bot with 49 function-calling tools that books car-workshop jobs by text or voice.
- **Call Automation:** Turned recorded Romanian/Russian calls into bookings, saving the owner ~10 hours a week.
- **Reliability:** Added code-level AI guardrails, 110 automated tests and Docker auto-updates with rollback.
- **Bot Platform:** Runs on Free-Bots, my reusable bot factory that sets up each client's bot at €0 infrastructure cost.

Automation Engineer – Marketplace Trading Automation — 2021 – 2026

- **Order Automation:** Priced and placed fee-aware orders for clients on three digital-item marketplaces.
- **Analytics:** Grew browser extensions into a Dockerized Flask dashboard with profit and trade analytics.
